Guarding The Children's Health

HOW many children are taught to use the tooth-brush regularly—and to use it rightly? Yet a clean mouth and sound teeth will either make or ruin their good health.

It is conceded by competent authorities that disease of childhood, such as measles, diphtheria, scarlet fever, and so-called infantile paralysis, are not nearly so apt to attack children with healthy teeth and clean mouths.

At St. Vincent's Orphanage, Boston, Mass., there had been very many cases of children's diseases. After the dentists taught these orphan children how to use the tooth-brush, and after their little mouths had been restored to health again, and kept that way, these children's diseases have been practically banished from that Boston institution.
